# Digital services for continuous learning (2021–2025)

October 12th, 2023

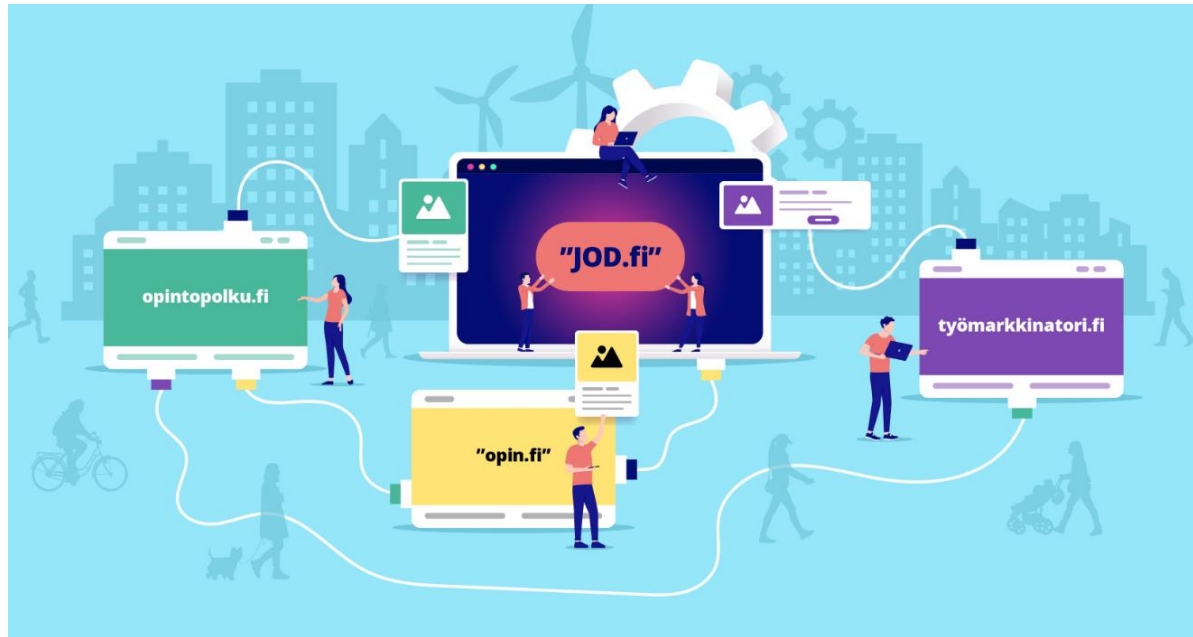

# Digital services for continuous learning

- “Digital services for continuous learning” is a joint project of the Ministry of Education and Culture and the Ministry of Economic Affairs and Employment (2021–2025).
- Stakeholders include the Finnish National Agency for Education, the Development and Administration Centre of the Centres for Economic Development (KEHA Centre) and higher education institutions through the [Digivision 2030 programme](#).
- The digital services support smooth transitions between education and working life.
- The digital service bundle consists of new and existing services ([StudyInfo](#), [Job Market Finland](#)) and other information resources.
- The total budget of the project is 22 million € for 2021–2025.
- The funds are from the European Commission, Recovery and Resilience Facility (RRF).

# Why was the project set up?

- Rapid changes in the working life and the technological transformation require lifelong/continuous learning.
- The existing digital services and information on skills and competence development possibilities are fragmented and available labour market information is scattered.

# Service bundle of continuous learning

- Enables seamless transitions between services for the end-user
- Usability of data between services
- New and existing services form a coherent and user-centric service paths

# Main goals for the project

- The purpose of the project is to enable people to use digital services for continuous learning to
  - gain information on study and work opportunities
  - use (digital) guidance tools to plan career pathways, including educational and work possibilities
  - receive foresight and other relevant data to support one's decisions
- Services are designed and developed in co-design with customers, in a user-centric manner.
- Services will be available in Finnish and Swedish and also in English on most parts.
- Accessibility is taken into account.

# The services are intended for...

**Individuals**

**Career  
councillors**

**Working life  
actors**

**Educational  
actors**

**Employment  
administration  
and education  
administration**

# Individuals

- Digital tools for identifying skills and competence
- Competence profile for overall view of individual's skills, interests and goals
- Matching tools for finding new career paths and possibilities on competence development
- Reliable and relevant labour market information
- Information about guidance and advisory services

# Career counsellors

- Relevant, up-to-date and reliable information, career counselling tools and best practices gathered into one service
- Interaction platform for career guidance workers on a general level
  - Best practices, information on updating education for career counsellors and research information

# Working life operators, educational actors, employment administration and education administration

- Information services including labour market information
- Offered as raw data and reports

# Thank you!
