Kärnkraftsreaktor Pyhäjoki

May the last wilderness of Europe remain nuclear free.

We like the water, soil and air to remain clean and safe for many generations to come. We like to see a thriving Sami culture. We like to see an abundant eco-system.

Currently there are plans to build a very big nuclear plant and start mining uranium in the north of Scandinavia, the last wilderness of Europe. This is a huge threat to our future. We like to continue to live off the land.
