Aihe: No nuclear power

Hi Fennovoima

Why build nuclear power plant when the degree of damage and danger in connection with an accident is known? What happens to our Baltic sea and all habitants around if an accident occurs? I wouldn't be responsible to that!!!

No, show the rest of the world your will, like Germany, to spend the investments on renewable sources of energy instead.

And besides, with help from Russian??? If you give them the little finger they take your hole hand!!!

I refer to diarienummer TEM/1212/08.04.01/2015

Best regards...
