

# Enhancing Economic Performance through Innovation Policy in Finland

Dr. Olli REHN, Minister of Economic Affairs

Seminar on the Role of R&D in Fostering Economic Performance:  
Lessons from Research and Implications for Finland  
1 December 2016, Radisson Blu Seaside Hotel, Helsinki

Ministry of Economic Affairs  
and Employment of Finland

# Innovation policy should be seen in the context of productivity and economic growth

- How to make the economy and employment flourish?
- How to improve the impact of the innovation system?
- Novel ideas and sophisticated views are welcome.

## Some policy approaches and views

- Efficient demand-driven policy measures for ecosystems.
- Open data, open science & innovation, and other sources of the openness should be exploited better.
- “R&D impact agenda” pushed forward with multilateral actions.
- R&D organisations could improve their business skills, encourage entrepreneurship, and facilitate the supply of research results.
