

Kokemuksia Huippuostajat ohjelmasta

Kasvupalveluseminaari

Mika Lautanala, Tekes, 30.8.2017

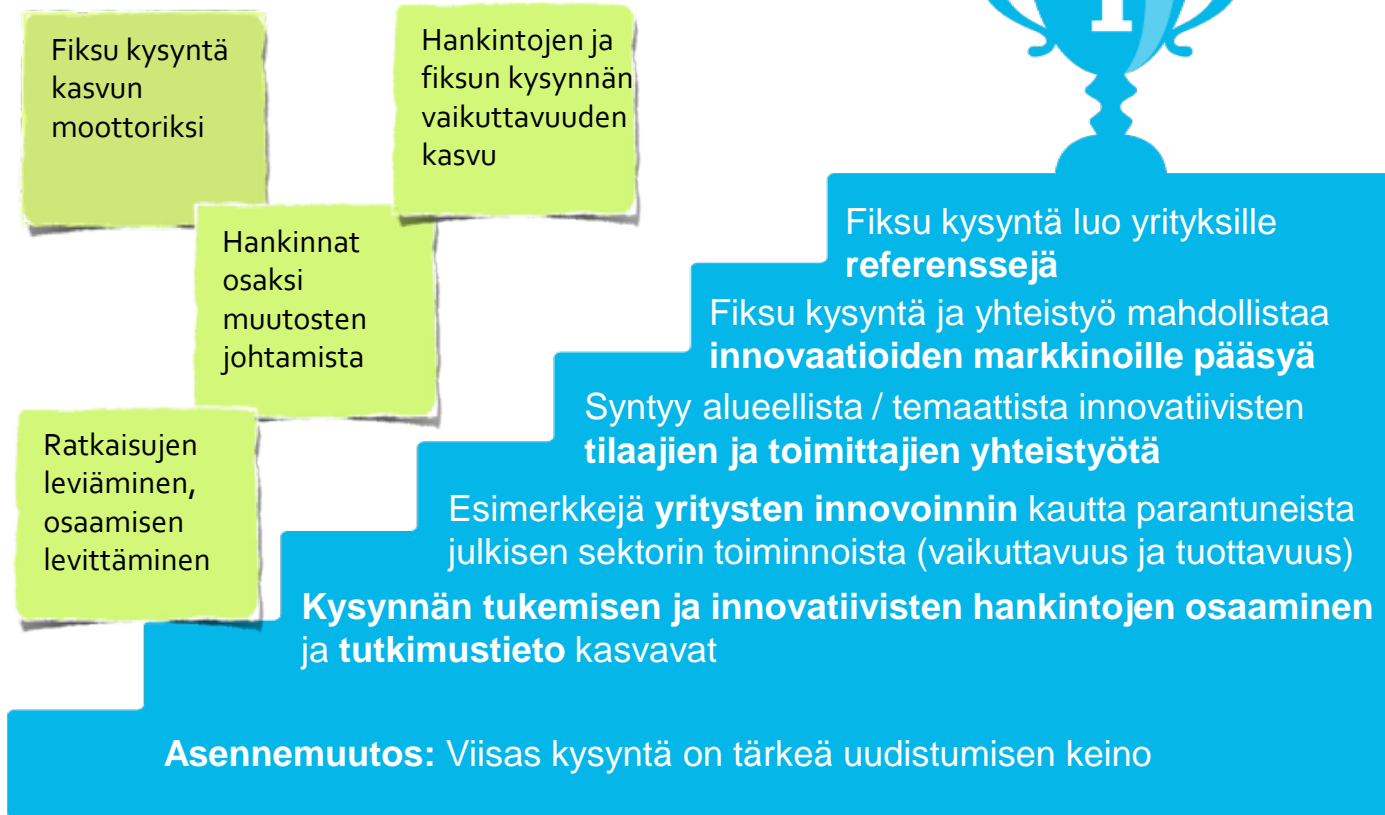

Visio: Suomi on fiksun kysynnän mallimaa

Missio: Kehitetään fiksum kysyntää ja luodaan edellytyksiä uusille markkinoille, joiden kautta yritykset kehittävät kilpailukykyään ja joissa yhteiskunnallisiin haasteisiin saadaan parhaita ratkaisuja

Ohjelman tavoitteet

REPO Nuclear Detection Architecture

Repo project 2012-2015

- 1st phase (2012-2014): Definition of Detection Architecture for Nuclear materials by Finnish security authorities
- 2nd phase: (2015-2016): System development by several companies, supported by STUK and VTT

Result: Repo Detection Architecture

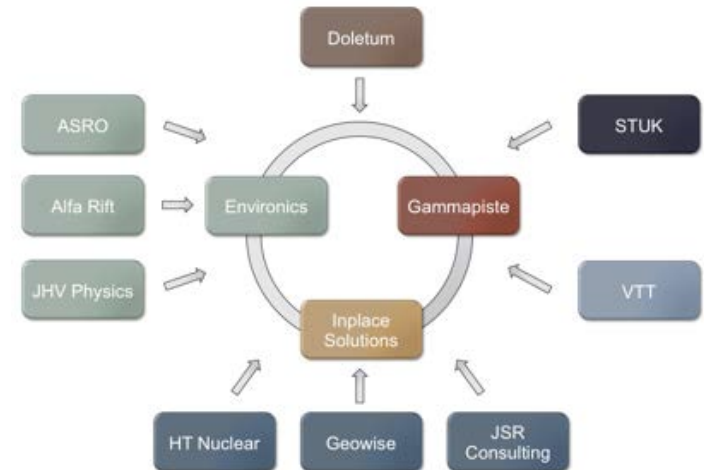

- Three lead companies – Detection, Location & Communication – form the platform
- Six other companies can integrate their products with the system

Field tests and evaluation

- The system has been field tested and evaluated by STUK

Presentations in Finland and abroad

- Presented in int'l conferences and expos in Finland (GICNT & NATO), Austria (IAEA), Italy (JRC) and Netherlands
- Field demos among others in Denmark, Estonia and Ukraine
- Interest also in many other countries
